Subject: Rowsey, Kevin has shared 'Washington Works - 2017_Annual_Report_final_complete'

Hey Meg, here is the annual report for PFOA sampling near Parkersburg. This report includes all the data from 2017 for Putnam Water. It looks like they have two production wells that they use and the concentrations have gotten up to 70 ppt (which is also the Health Advisory action level). However, after RO treatment at the entry point to distribution the concentration is 13-23 ppt which is well below the HA.

Let me know if you need anything else!

Kevin
